

Transfusion Science Course March 25 - 28, 2019

Bio-Rad considers it of great importance to invest in continuous education in order to promote Good Practice and disseminate new concepts within the discipline.

We try to provide a broad content, with lectures reviewing well-known immunohematological theories as well as keeping up-to-date with state-of-the-art lectures in Transfusion Science.

It is therefore a great pleasure to inform you that the next Transfusion Science course will take place here at Bio-Rad, Cressier, Switzerland **in the week beginning March 25, 2019.**

A special interactive session featuring complex case studies will be held during this course! The challenge is to actively engage the attendees in the session by using the Electronic Voting System (EVS).

From a one-way transmission of information into a two-way conversation between presenters and attendees!

If you are interested in participating, please contact our representative in your country for further information.

We are looking forward to seeing you all in the upcoming Transfusion Science Course!

Paul Aerts
Scientific Affairs Manager

SPEAKERS

Carla Dinardo, MD, PhD

Fundação Pró-Sangue/Hemocentro de São Paulo,
Head of the Immunohematology Division
São Paulo, Brazil

Sunitha Vege, MS

Manager, Genomics Laboratory
New York Blood Center, NY, USA
